Please join us for a work session covering a project overview; safety; construction and business development with representatives from Dominion Energy, Piedmont Natural Gas and Duke Energy.

The Atlantic Coast Pipeline, LLC, a company formed by three major U.S. energy companies – Dominion, Duke Energy and Southern Company Gas – to develop, own and operate the Atlantic Coast Pipeline (ACP). The pipeline will deliver new supplies of clean-burning natural gas to public utilities in the region in order to generate cleaner electricity, heat homes and power local businesses. The underground pipeline project would facilitate cleaner air, increase reliability and security of natural gas supplies, and provide a significant economic boost in North Carolina.
